Push Cart Shield

Automotive Armor Manufacturing, Inc. (AAM) shields are engineered with rugged, lightweight and maneuverable qualities to provide longevity as well as the utmost protection. Our shields are manufactured with advance composite ballistic cores and encapsulated with a hybrid nano composite shell.

Push Cart Shield is designed to meet the following specifications:

- Heavy duty aluminum and composite handle system
- Premium ballistic glass view port 8.5" x 18"
- Heavy duty aluminum handle system
- 10" front and 13" rear wheels
- Sides with coverage in NIJ IIIA - 4" x 63"
- Defeats multiple round threats
- Exceeds National Institute of Justice (NIJ) standards
- NIJ Ballistic Level - III++

Weight 173 Pounds

(Defeats 7.62 x 39 MSC [M1943], and 55.6 or 223 SC Green Tip [M855 / SS109], and lesser threats)

AAM shields are made from high quality composites, which properties include:

- High strength and low density
- Excellent energy absorption
- 15 times the strength of steel (pound for pound)
- Resists chemicals, UV light and water

Options:

- Color - Black, or OD Green
- Super Bright LED light system (1000 Lumen +)

Ballistic coverage area of 28" x 64"

Proudly made in the USA.
